ABOUT

I built my first websites in 7th grade and never left development since. The path went from agency landing pages to production I built myself from scratch: mstar.uz, the ticketing platform of the largest event organiser in Tashkent. Django, one developer, live since 2024.

Alongside that I earned a Computer Science degree at Zhejiang University of Technology and worked in China — partnership negotiations, sales, interpreting. So I am equally comfortable writing backend code and closing a deal with a supplier in Chinese.

I have used AI tools in my work for more than five years — not as a chat toy, but to automate real processes: from routine work in the family factory to speeding up my own development.

FLAGSHIP PROJECT

Live since 2024

mstar.uz

Ticketing platform for the largest event organiser in Tashkent.

Django · Sole developer · Zero to production

- Designed and wrote the entire project, from the first line of code to launch.
- Grew from a landing page into an online ticketing system connected to the physical box office and sales floor.
- Set up and maintain the server: environment, deployment, SSL, updates.
- Currently responsible for technical support and further development.

EXPERIENCE

2024 — present

mstar.uz

Full-stack Developer, Technical Support

Tashkent

- Sole developer of the ticketing platform: Django, server, deployment, maintenance.
- Online sales connected to the physical box office and sales floor.

2025

Partner business development

Marketing and investment

Tashkent

- Invested my own funds and ran promotion and customer acquisition.
- Project closed by mutual decision of the partners.

2024 — 2025

Huadong Holding

Sales Manager, Interpreter

China

- Arranged partnership negotiations between the holding and Uzbek pharmaceutical companies.
- Interpreted negotiations and translated documentation both ways: Chinese and Russian.
- Introduced AI tools into the department's workflow and trained colleagues to use them.

2020 — present

Talks UZ

Co-founder, Developer

Tashkent · project paused

- Media project on culture and events. Built the website, owned the technical side and promotion.
- Covered major concerts and events.
- Project paused — the team went separate ways.

2017 — 2020

MustMedia UZ

Web Developer

Tashkent

- Built landing pages and corporate websites for agency clients.
- Markup, CMS work, deployment to hosting.
- Joined the agency while still at school. The agency closed during the lockdown.

2015 — present

Family business — textile manufacturing

Procurement and Technical Support

Tashkent · part-time

- Work with Chinese suppliers: sourcing raw materials and spare parts, negotiating in Chinese.
- Maintaining computers and production equipment: diagnostics, repair, setup.
- Automating routine processes, including with AI tools.

2015 — present

Freelance — web development

Websites, landing pages, online stores

Tashkent

- Dozens of full-cycle projects: markup, CMS, content, deployment, handover to the client.
- Work lives in private repositories and is not published publicly.
